

Chastity cage X0020 silicone

PRODUCT MANUAL

**3 1/4" male chastity
cock cage**

**Vented design for
easy cleaning**

**5 U-ring sizes for
the perfect fit**

4 spasers

**Strong brass
padlock with 2 keys**

**Made from silicone
and ABS plastic**

Kit includes:

- A cage, 5 U-rings, 4 locking pins, 4 spacers, a base (comes in 2 pieces), a padlock with 2 keys, and travel-friendly locks.

How To Assemble

- Put the U-Ring under and behind the testicles and penis. Your kit comes with 5 different sized U-Rings. Choose the size that provides a snug, but not tight fit.
- Insert the Base # 1 with the guide pins facing out, away from the body through the holes in the U-Ring.
- Slide the Base # 2 piece onto the guide pins forming a solid ring. Make sure to push the penis in a down position while attaching Base # 1 & Base # 2.
- Insert the locking pin through the center holes in Base # 1 & Base # 2.

How To Assemble

- The spacers are designed in such a way that each spacer fits a particular locking pin. Your kit comes with 4 locking pins and spacers. Choose the one that provides a snug, but not tight fit.
- Lubricate the head and shaft of the penis using a water-based lubricant. Put the product on while in a relaxed state. Insert the penis into the cage. Push the penis down in order to avoid pinching when connecting the cage to the ring.
- After assembling the ring, guide pins, locking pin and spacers to the cage, attach the brass padlock. Make sure to have a diligent Keyholder!
- Always take the time to smooth any loose skin around the rings and cage for the most comfortable fit.

Cleaning and Care

- Use a toy cleaner/mild soap with water to clean the product before and after each use.
- Pat with a towel and allow it to air-dry completely.
- Use with the water-based lube only, no silicone lubricants.
- The item can be sterilized with a 5% bleach solution or alcohol.
- The item can be washed in a dishwasher.

Warning

- Stop using the chastity cock cage if pain occurs.
- Do not use the chastity cock cage under the influence of alcohol or drugs, since it may impair the user's judgment and increase the risk of injury to the penis.
- Misuse of a chastity cock cage may cause bruising, painful injury, or permanent damage to the penis.
- Chastity cock cages do not prevent pregnancy.

Precautions

- Use of a chastity cock cage may aggravate already existing conditions such as Peyronie's disease (the formation of hardened tissue in the penis that causes pain, curvature, and distortion, usually during erection); priapism (persistent, often painful erection of the penis as a consequence of disease and not related to sexual arousal); and urethral strictures (urethral stricture is an area of hardened tissue, which narrows the urethra, sometimes making it difficult to urinate).

- Incorrect use of this device may bruise or hurt the blood vessels within the penis or scrotum, resulting in petechiae (a small purplish spot on a body surface, such as the skin or mucous membrane, caused by a minute hemorrhage), hemorrhage (flow of blood from ruptured blood vessels), or the formation of a hematoma (localized swelling filled with blood resulting from a break in a blood vessel).
